The World

RESIDENCES AT SEA

By Renato Schweizer

The World Residences at Sea announces remarkable 2018 Journey – Features extensive visit to Europe, including Svalbard Expedition and British Isles Exploration.

The World, the largest privately owned residential yacht on earth (aboardtheworld.com), has announced a remarkable 2018 journey. The carefully crafted itinerary, which is determined by the residents themselves, blends iconic larger cities around the world with smaller more remote and less traveled locations. This incredible journey will be filled with one-of-a-kind experiences for *The World's* 142 families as they travel the globe from the comfort of home on this unique and elegant private mega yacht.

After welcoming the first light of 2018 in Miami, the ship will set sail to explore the captivating coast of Brazil. The private community-at-sea will also undertake a deep exploration of the Mediterranean and Scandinavia, arriving in Namibia and South Africa in December to mark the end of the year in Cape Town.

The World's Expeditions and In-depth Explorations

Svalbard Archipelago Expedition 2018

Sailing from Tromso, Norway at the beginning of August, *The World* will undertake an 11-day expedition through the

Svalbard Archipelago. Situated 600 nautical miles from the North Pole, Svalbard provides residents with wonderful occasions for encounters with both animals and polar landscapes.

British Isles Exploration 2018

In early autumn, *The World* sails to the British Isles to experience the more remote regions. The ship will travel to the isolated archipelago of St. Kilda and on to additional islands throughout the Hebrides such as the Glannan Isles, Shetland Islands and Orkney Islands to sample Scotland's finest single malt whiskeys along the way and enjoy some of the world's most renowned golfing venues.

Mid-Atlantic Exploration 2018

In December, *The World* traverses the Mid-Atlantic from the Canary Islands to South Africa via the remote Overseas British Territories of volcanic Ascension and St. Helena. These tiny but diverse sub-tropical islands and surrounding waters are home to endemic birds, fish and plants found nowhere else on the planet. The well-preserved ecosystem attracts a variety of marine life and the ocean teems with dolphins and whales. ■

All 165 homes onboard *The World* are privately owned with a small selection available for re-sale every year. To learn more about this unique lifestyle call 954-538-8449 or visit www.aboardtheworld.com.
